Hi Tim,

I think all of us have a short and busy week so next week will probably be better for all of us.

Please provide us with a couple of time blocks that work for you - this will ease meeting coordination with our folks at USCG and MARAD

Thank you

Galia

Galia,

I am finding myself overwhelmed this week. With Monday a holiday and Friday scheduled off, I have not had the chance to schedule a meeting with you.

If you don't mind, next week is a full week, I'd like to organize a call then. I've reached out to our Refuge and one of the on site managers will join us. Tetrattech consulting contacted me again today and talked about the NEPA and permitting for the project. I can relay that conversation with you when we talk.

Thank you for your patience,

Tim Allen

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Hello Mr. Allen,

Thank you for your email and apologies for your late notification of this ongoing project.

We may not have contacted the right offices in our email dated June 7, 2022 that was sent to Ms. Brigitte Firmin Deputy Supervisor US DOI, Mississippi Basin Region, Fish and Wildlife Services, Louisiana Ecological Services Office, as well as Joshua Marceaux and Ronald Paille.

In response to our request for US FWS to be a cooperating agency on this project, they declined the offer because the proposed action did not appear, at the time of writing, to have any elements that fall within the jurisdiction for the Louisiana Ecological Services Office.

Based on your email, it appears that this may have changed.

Please provide us with a couple of dates/time that work for you so that we can coordinate a meeting with our Environmental Protection Specialists and discuss the action under consideration and determine whether an Air Quality Related Values evaluation is needed.

Thank you for reaching out and helping us ensure project integrity.

Regards

Galia Kaplan

Hello,

Our U.S. Fish & Wildlife Service office in Louisiana has been approached by persons representing the New Fortress Energy LNG terminal. They provided materials to our Refuge management on the project and gave perspective to the proximity of Breton Island Wilderness area, a Clean Air Act (CAA) protected Class I Wilderness.

Following that, the air quality consultant representing New Fortress Energy contacted our national air quality office regarding potential evaluations to Breton. They've asked that we assist in providing meteorological data in support of their Class I impact analysis.

On '<https://louisianaflngnepaprocess.com/>', I was able to find your names as contacts for NEPA and Licensing efforts.

## Front Page - New Fortress Energy Louisiana FLNG Project

New Fortress Energy Louisiana FLNG License Application. On March 31, 2022, the Maritime Administration (MARAD), an agency within the U.S. Department of Transportation, and the U.S. Coast Guard (USCG) received an application from New Fortress Energy Louisiana FLNG LLC (the Applicant) seeking a Federal license under the Deepwater Port Act of 1974 (DWPA), as amended, to develop the New Fortress ...

Under Federal Land Manager guidance (FLAG 2010), we ask for notification on all major projects within 300km of a Class I area. As we've just learned of this effort, I would appreciate you contacting us so we can discuss th

We look forward to the opportunity to talk with one or both of you soon.

Tim Allen  
Branch of Air & Water Resources  
U.S. Fish & Wildlife Service
